Art Unit: 2822

Claims 53-62 are pending. Claim 58 stands non-elected without traverse per paper number 5.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 53-57 and 59-62 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zimlich (6,130,106).

Zimlich teaches a structure for a field emitter in Figures 2-3 and columns 2-3. The field emission device comprises a doped polysilicon base 34. Layer 34 is etched and the top tip is doped to make it low work function or alternatively is coated with Cesium to be low work function. (See specifically column 2 lines 29-34 and column 3 lines 4-8). Zimlich renders obvious the claimed invention.
